To: The Commission

PETITION FOR RULE MAKING

I, **ROBERT B., HENRY JR., N6HOJ**, Hereby respectfully submit my request to the Federal Communications Commission to **NOT** take action on this Petition For Rule Making, RM-7869, as submitted by the American Radio Relay League.

To allocate the indicted frequencies for the use of such a small percentage of possible users as opposed to the vast numbers of people who use available repeaters that have their input frequencies in that area of the spectrum is beyond my comprehension. Not only is the everyday use of these repeaters threatened but in the event of a local or regional emergency, these repeaters would be unavailable for use.

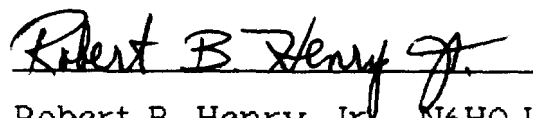

I am relatively new as an Amateur Radio Operator. However, it did not take long for me to realize that those individuals who have

had licenses for many year have taken much time, effort and personal expense to do considerable planning in order to establish repeater systems that are pleasurable to use on a daily basis for keeping in touch with family and friends but are there to be used in the event of local emergencies and disasters covering hundreds of square miles.

It would not be in keeping with the intent of the existance of the Amateur Radio Service to make such a change and threaten the well being of the general public, stipulated in appropriate treaties and regulations. I therefore repeat my request to you to **NOT** take any action on RM-7869.

Respectfully Submitted,

December 23, 1991
